Summer Stretch 2025

Summer Fun AND Summer Learning!

Summertime is a great time to be a kid! The season is filled with sun, water, and outdoor fun. As it should be! But for elementary and middle school students, it can also be filled with summer learning – “Summer Stretch 2025.”

Research shows that all students experience learning loss over the summer when they do not engage in educational activities, and Summer Stretch, which takes place in June, provides a great opportunity to mix summer fun with learning. Each year, new classes are added to allow students to choose from an assortment of classes that peak their interests, and this year is no different. This year, a wide variety of new classes have been added to our Stretch offering. There is a great mix of enrichment and review classes. Make sure to talk to your child’s teacher for specific recommendations. Summer Stretch acknowledges the unique role that summer plays in American culture – a season for outdoor fun mixed with learning!

Reading is one of the most important things a child can do in the summer to keep his/her skills sharp for the next school year. Adults can help by making sure children have lots of access to books and by engaging with what their children are reading. Read! Everyday!

Learning is a treasure that will follow its owner everywhere.
